

GARBAGE AND SCRAP METAL STORAGE

1. PREPARATION

- a. Locate dumpsters and trash cans with lids in convenient, easily observable areas.
- b. Locate scrap metal bin under cover if there is no lid or tarp to provide cover.
- c. Provide properly-labeled recycling bins to reduce the amount of garbage disposed.
- d. Provide training to employees to prevent improper disposal of general trash.
- e. Control runoff of sediments and debris from trash storage areas. Provide silt traps or oil water separators at run off entry points into the storm drain system.

2. PROCESS

- a. Inspect garbage bins for leaks regularly, and have repairs made immediately by responsible party.
- b. Locate dumpsters on a flat, impervious surface that does not slope or drain directly into the storm drain system.
- c. Control runoff leaving the storage areas.
- d. Keep lids closed when not actively filling dumpster.

3. ACTIONS

- a. Keep areas around dumpsters clean of all garbage.
- b. Have garbage bins emptied regularly to keep from overfilling.
- c. Wash out bins or dumpsters as needed to keep odors from becoming a problem. Wash out in properly designated areas only.

4. DOCUMENTATION

- a. Check during each inspection.
